3.7 Swimming pool

The pool is located between two stable pontoons in the Wöhrsee. The turbidity of the water cannot be influenced. For this reason, each lane receives a guide line which is located under the swimmer. The last 5m of the guide line are marked. The water temperature depends on the weather and will be measured and officially announced on the day of the competition. There is a ladder on both sides of the pool in each lane. This ladder will be used to get in and out of the pool and also for safety reasons in case an athlete feels uncomfortably during the swim.
